

Quectel Cellular Engine

GSM STK AT Commands

GSM_STK_ATC_V1.1

Document Title	GSM STK AT Commands
Version	1.1
Date	2015-05-11
Status	Release
Document Control ID	GSM_STK_ATC_V1.1

General Notes

Quectel offers this information as a service to its customers, to support application and engineering efforts that use the products designed by Quectel. The information provided is based upon requirements specifically provided to Quectel by the customers. Quectel has not undertaken any independent search for additional relevant information, including any information that may be in the customer's possession. Furthermore, system validation of this product designed by Quectel within a larger electronic system remains the responsibility of the customer or the customer's system integrator. All specifications supplied herein are subject to change.

0. Revision history

Revision	Date	Author	Description of change
1.0	2011-3-14	Joanna LI	Initial
1.1	2015-05-011	Thomas ZHANG	Added applicable modules

1. Introduction

Quectel Module provides AT commands to support STK. This document is a reference guide to all the AT commands and responses defined for STK.

The SIM Application Toolkit (SAT/STK) provides mechanisms which allow applications, existing in the SIM, to interact and operate with any ME which supports the specific mechanism(s) required by the application. Please go to GSM 11.14 for more details about STK. Quectel provides AT commands to support profile download (+STKPD), envelope (+STKENV), terminal response (+STKTR), get STK indication (+QSTK) and trigger STK call (+STKCALL), SMS (+STKSMS), SS (+STKSS), USSD (+STKUSSD) and DTMF (+STKDTMF).

This document is applicable to all Quectel GSM modules except for GCxx modules.

1.1. Reference

Table 1: Reference

SN	Document name	Remark
[1]	M10_ATC.pdf	The introduction of AT commands for M10
[2]	GSM 11.14	Specification of the SIM Application Toolkit for the SIM-ME interface
[3]	GSM 11.11	Specification of the SIM-ME interface

1.2. Terms and abbreviations

Table 2: Terms and abbreviations

Abbreviation	Description
SAT/STK	SIM Application Toolkit
SIM	Subscriber Identity Module
ME	Mobile Equipment
SMS	Short Message Service
SS	Supplementary Service
USSD	Unstructured Supplementary Service Data
BER	Basic Encoding Rules of ASN.1
TLV	Tag, Length, Value
&h	Hexadecimal format
&d	Decimal format

2. AT Commands for STK

2.1. Overview of AT Commands for STK support

Command	Description
AT+QSTK	TURN ON/OFF STK FUNCTION
AT+STKPD	STK PROFILE DOWNLOAD
AT+STKENV	STK ENVELOPE COMMAND
AT+STKTR	STK TERMINAL RESPONSE
AT+STKCALL	TRIGGER STK CALL
AT+STKSMS	TRIGGER STK SMS
AT+STKSS	TRIGGER STK SS
AT+STKUSSD	TRIGGER STK USSD
AT+STKDTMF	TRIGGER STK DTMF

2.2. Details for AT Commands for STK support

2.2.1. AT+QSTK STK Turn on/off STK function

AT+QSTK Turn on/off STK function	
Test Command AT+QSTK=?	Response +QSTK: (0-1) OK
Read Command AT+QSTK?	Response +QSTK :<n> OK Parameters See Write Command
Write Command AT+QSTK=<n>	Response If format is right, response OK Otherwise response +CME ERROR: <err> Parameter <n> Whether turn on the STK function

	<u>0</u> Turn off <u>1</u> Turn on
Reference	Note: <ul style="list-style-type: none"> Must restart the module and make sure SIM card is unlocked to use STK commands.

Example:

AT+QSTK=1

OK

Restart the module, enter PIN code if SIM card is locked. Then the following indication will come up, including the main menu list:

+STKPCI: 0, "D07A8103012500820281828507804E16754C98CE8F0A018070ED70B963A883508F0A028065B095FB8D227ECF8F0A0380554665C552A9624B8F0A0480624B673A74068D228F0A058081EA52A9670D52A18F0A06806D41884C77ED4FE18F06078070AB94C38F0A0880624B673A97F34E508F0A09807CBE5F694E0A6D77"

Parsed Data:

Please refer to the appendix in this document for details below.

D0	Proactive SIM command tag				
7A	Length	1. If the length is between 0 and 127 (00 to 7F&h), it's coded onto one byte. For example, "7A" = 122&d. 2. If the length is between 128 and 255 (80 to FF&h), it's coded onto two bytes leading with "81". For example, "81BA" = 186&d.			
8103012500	81	03	01	25	00
	Command details tag	Length	command number	Type of command: Set up menu	Command Qualifier
82028182	82	02	81	82	
	Device identity tag	Length	Source: SIM	Destination: ME	
8507804E16754C98CE	85	07	804E16754C98CE		
	Alpha identifier tag	Length	Alpha identifier: 80: UCS2 coding 4E16754C98CE:世界风		
8F0A018070ED70B963A88350	8F	0A	01	8070ED70B963A88350	
	Item tag	Length	ID of item: 1	Text string of item 80: UCS2 coding 70ED70B963A88350: 热点推荐	
8F0A028065B095FB8D227ECF	Item 2: 新闻财经				
8F0A0380554665C552A	Item 3: 商旅助手				

9624B	
8F0A0480624B673A740 68D22	Item 4: 手机理财
8F0A058081EA52A967 0D52A1	Item 5: 自助服务
8F0A06806D41884C77 ED4FE1	Item 6: 流行短信
8F06078070AB94C3	Item 7: 炫铃
8F0A0880624B673A97 F34E50	Item 8: 手机音乐
8F0A09807CBE5F694E 0A6D77	Item 9: 精彩上海

2.2.2. AT+STKPD STK profile download

AT+STKPD STK profile download	
Test Command AT+STKPD=?	Response OK
Execution Command AT+STKPD	Response Do the profile downloading. OK
Read Command AT+STKPD?	Response Get the terminal profile setting. +STKPD: <Profile> OK Parameter <Profile> HEX string of STK profile.
Reference	Note: <ul style="list-style-type: none"> ● Profile downloading provides a mechanism for the ME to tell the SIM what it is capable of. ● The structure of profile content is specified in GSM 11.14 subclause 5.2 Structure and coding of TERMINAL PROFILE.

Example:

AT+STKPD?

+STKPD: "FFFFFFF7F1F007FFF00001F230811060700"

OK

2.2.3. AT+STKENV STK Envelope command

AT+STKENV STK Envelope command	
Test Command AT+STKENV=?	Response OK
Write Command AT+STKENV=<sat_command>	Response This command is used to send STK Envelope command. OK Parameters <sat_command> HEX string of STK envelope command
Reference	Note: <ul style="list-style-type: none"> The structure of envelope command is specified in GSM 11.14 clause 7 to clause 11. Below example is to send envelope command for menu selection.

Example:

Select item 4 (Refer to GSM 11.14 subclause 8.2 Structure of [ENVELOPE \(MENU SELECTION\)](#)):

AT+STKENV="D30782020181900104"

OK

Parsed Data:

D3	Menu Selection tag			
07	Length			
82020181	82	02	01	81
	Device identity tag	Length	Source device identity: Keypad	Destination device identity: SIM
900104	90	01	04	
	Item identifier tag	Length	ID of item chosen: 04	

2.2.4. AT+STKTR STK terminal response

AT+STKTR STK terminal response	
Test Command AT+STKTR=?	Response OK
Write Command AT+STKTR=<terminal_response>	Response This command is used to send STK Terminal Response. OK Parameter

	<terminal_response> HEX string of STK response
Reference	Note: <ul style="list-style-type: none"> ● The structure of terminal response is specified in GSM 11.14 clause 6.8.

Example 1: Terminal response of Selecting item

+STKPCI: 0,"D07081030124008202818285098081EA52A9670D52A18F100180004F00540041670D52A1630753578F0A02805BA2670D70ED7EBF8F0C0380005600490050540D72478F0A0480805476DF670D52A18F0A05808BDD8D3967E58BE28F0A068079EF520667E58BE28F0A07805DF25B9A4E1A52A1"

AT+STKTR="810301240082028281830100900105"

OK

Parsed data for SELECT ITEM proactive command:

D0	Proactive SIM command tag
70	Length
8103012400	Command details : type of command 24 -- Select Item
82028182	Device identity : source SIM > destination ME
85098081EA52A9670D52A1	Alpha identifier : 自助服务
8F100180004F00540041670D52A1630753578F0A02805BA2670D70ED7EBF8F0C0380005600490050540D72478F0A0480805476DF670D52A18F0A05808BDD8D3967E58BE28F0A068079EF520667E58BE28F0A07805DF25B9A4E1A52A1	Item 1. OTA 服务指南 Item 2. 客服热线 Item 3. VIP 名片 Item 4. 联盟服务 Item 5. 话费查询 Item 6. 积分查询 Item 7. 已定业务

Parsed data for TERMINAL RESPONSE of SELECT ITEM:

8103012400	Command details : type of command 24 -- Select Item		
82028281	Device identity : source ME > destination SIM		
830100	83	01	00
	Result tag	Length	General result: 00 command performed successfully
900105	Item identifier : 05		

Example 2: Terminal response of Getting input – input short message content

+STKPCI: 0,"D01E8103012303820281828D0F08300E8F93516551855BB9003A300F9102018C"

AT+STKTR="8103012303820282818301008D05084F60597D"

OK

Parsed data for GET INPUT proactive command:

D0	Proactive SIM command tag			
1E	Length			
8103012303	Command details : type of command 23 -- Get input			
82028182	Device identity : source SIM > destination ME			
8D0F08300E8F935 16551855BB9003A 300F9102018C	8D	0F	08	300E8F9351655185 5BB9003A300F
	Text string tag	Length	Data coding scheme: it is coded as for SMS Data coding scheme defined in GSM03.38. 08 - UCS2 04 - 8 bit coding	Text string: 『输入内容:』 It means "input content" in English.
9102018C	91	02	01	8C
	Response length tag	Length	Min length: 1	Max length: 8C&h=140&d

Parsed data for TERMINAL RESPONSE of GET INPUT:

8103012303	Command details : type of command 23 -- GET INPUT
82028281	Device identity : source ME > destination SIM
830100	Result : 00 command performed successfully
8D05084F60597D	Text string : UCS2 "你好"

Example 3: Terminal response of Getting input – input target number of short message

```
+STKPCI: 0,"D01A8103012300820281828D0B088F93516553F77801FF1A91020114"  
AT+STKTR="8103012300820282818301008D0C043133373634343132313531"  
OK
```

Parsed data:

+STKPCI: text string: “输入号码: ”, it means “Input number” in English.

Terminal response: input number “13764412151”, 8 bit coding schema.

Note: The terminal response is similar as above example 2: using UCS2 coding to input message content in example 2, while using 8-bit coding to input number here.

Example 4: Go backward to the item at higher level

```
AT+STKTR="810301240082028281830111"  
OK
```

Example 5: Return to the main menu directly

```
AT+STKTR="810301230082028281830110"  
OK
```

Parsed data of example 4 and 5:

830111	Result: 11 - Backward move in the proactive SIM session requested by the user
830110	Result: 10 - Proactive SIM session terminated by the user

Note: In example 4 and 5, type of command in terminal response should be the same as that in +STKPCI last time.

2.2.5. AT+STKCALL Trigger STK Call

AT+STKCALL Trigger STK Call	
Test Command AT+STKCALL=?	Response OK
Write Command AT+STKCALL=<n>	Response If format is right, response OK Otherwise, response ERROR Parameters <n> 0 Trigger modem to send STK CALL SETUP 4 Trigger modem to send STK CALL SETUP but icon cannot be displayed 16 Proactive session terminated by user 18 No response from user 32 ME currently unable to process this command 34 User reject setup call 50 Command data not understood by ME
Reference	Note: ● Type of command value for Setting up call is “10”.

2.2.6. AT+STKSMS Trigger STK SMS

AT+STKSMS Trigger STK SMS	
Test Command AT+STKSMS=?	Response OK
Write Command AT+STKSMS=<n>	Response If format is right, response OK Otherwise, response ERROR

	Parameters <n> 0 Trigger modem to send STK SMS 4 Trigger modem to send STK SMS but icon cannot be displayed
Reference	Note: ● Type of command value for sending short message is "13".

Example: Send short message

+STKPCI: 1,"D0198103011300820281838B0E010005A10180F600040459454358"

AT+STKSMS=0

OK

Parsed data for Send Short Message proactive command:

D0	Proactive SIM command tag		
19	Length		
8103011300	Command details : type of command 13 - send short message		
82028183	Device identity : source SIM > destination Network		
8B0E010005A10180F600040459454358	8B	0E	010005A10180F600040459454358
8	SMS TPDU tag	Length	SMS TPDU: TA(Target Address): 10086 UD(User Data): "YECX" (china mobile provides this code to check balance)

2.2.7. AT+STKSS Trigger STK SS

AT+STKSS Trigger STK SS	
Test Command AT+STKSS=?	Response OK
Write Command AT+STKSS=<n>	Response If format is right, response OK Otherwise, response ERROR Parameters <n> 0 Trigger modem to send STK SS 4 Trigger modem to send STK SS but icon cannot be displayed 50 Command data not understood by ME
Reference	Note: ● Type of command value for sending SS is "11".

2.2.8. AT+STKUSSD Trigger STK USSD

AT+STKUSSD Trigger STK USSD	
Test Command AT+STKUSSD=?	Response OK
Write Command AT+STKUSSD=<n>	Response If format is right, response OK Otherwise, response ERROR Parameters <n> 0 Trigger modem to send STK USSD 4 Trigger modem to send STK USSD but icon cannot be displayed 50 Command data not understood by ME
Reference	Note: ● Type of command value for Sending USSD is “12”.

2.2.9. AT+STKDTMF Trigger STK DTMF

AT+QSTKDTMF Trigger STK DTMF	
Test Command AT+STKDTMF=?	Response OK
Write Command AT+STKDTMF=<n>	Response If format is right, response OK Otherwise, response ERROR Parameters <n> 0 Trigger modem to send STK DTMF 4 Trigger modem to send STK DTMF but icon cannot be displayed 32 ME currently unable to process command
Reference	Note: ● Type of command value for sending DTMF is “14”.

3. +STKPCI STK Proactive Command Indication

This unsolicited result code is used to indicate Proactive Command Indication.

Format:

+STKPCI: <pci_type> [,<proactive_command>]

<pci_type>

- 0 The SAT command is handled by TE.
- 1 The SAT command is handled by ME.
- 2 No other command (end of session)

<proactive_command>

HEX string of STK proactive command, sent when <pci_type> = 0 or 1

4. Examples

4.1. SET UP MENU Proactive Command

Description: An example of SET UP MENU proactive command.

4.1.1. Raw data

```
+STKPCI:0, "D081C0810301250082028182850B80906050B3670D52D953408F0C02804F86

5. Appendix: STK protocol structure

Here list some structures which have been used in this document for better understanding. More details please refer to GSM 11.14.

5.1. Structure of SIM Application Toolkit communications

Please refer to GSM 11.14 Annex D.

BER-TLV data object:

Tag	Length	Value	1..n SIMPLE TLV objects
-----	--------	-------	-------------------------

SIMPLE-TLV data object:

Tag	Length	Value	1..m elements
-----	--------	-------	---------------

5.2. BER_TLV tag in SIM to ME direction

Please refer to GSM 11.14 subclause 13.2.

Description	Length	Value
Proactive SIM command tag	1	D0

5.3. BER_TLV tag in ME to SIM direction

Please refer to GSM 11.14 subclause 13.1.

Description	Length	Value
SMS-PP download tag	1	D1
Cell Broadcast download tag	1	D2
Menu Selection tag	1	D3
Call control tag	1	D4
MO Short message control tag	1	D5
Event download tag	1	D6
Timer expiration	1	D7

5.4. Simple TLV objects

Please refer to GSM 11.14 subclause 13.3 for Simple TLV tag value in both directions.

The structure of simple TLV data object is Tag, Length, Value elements. Below table lists tag value and elements.

Tag	Value	Elements	Reference in
Description	Value	Elements	Reference in

			GSM 11.14
Command details tag	01 or 81	Command number	12.6
		Type of command	
		Command Qualifier	
Device identity tag	02 or 82	Source device identity	12.7
		Destination device identity	
Result tag	03 or 83	General result	12.12
Alpha identifier tag	05 or 85	Alpha identifier (If the first byte is "80", it means UCS2 coding schema)	12.2
Address tag	06 or 86	TON and NPI	12.1
		Dialing number string	
SS string tag	09 or 89	TON and NPI	12.14
		SS or USSD string	
USSD string tag	0A or 8A	Data coding scheme	12.17
		USSD string	
SMS TPDU tag	0B or 8B	SMS TPDU	12.13
Text string tag	0D or 8D	Data coding scheme	12.15
		Text string	
Item tag	0F or 8F	Identifier of item	12.9
		Text string of item (If the first byte is "80", it means UCS2 coding schema)	
Item identifier tag	10 or 90	Identifier of item chosen	12.10
Response length tag	11 or 91	Minimum length of response	12.11
		Maximum length of response	

Type of Command: (Refer to GSM 11.14 subclause 13.4)

Value	Name
10	Set up Call
11	Send SS
12	Send USSD
13	Send short message
14	Send DTMF
21	Display text
23	Get input
24	Select item
25	Set up menu

Device identity

Value	Name
01	Keypad
02	Display
81	SIM

82	ME
83	Network

General result:

Value	Meaning
00	Command performed successfully
10	Proactive SIM session terminated by the user;
11	Backward move in the proactive SIM session requested by the user

5.5. Structure of terminal response

Please refer to GSM 11.14 subclause 6.8.

Description	M/O
Command details	M
Device identities	M
Result	M
Text string	M/O
Item identifier	M/O

5.6. Structure of envelope for menu selection

Please refer to GSM 11.14 subclause 8.2.

Description	M/O
Menu selection tag="D3"	M
Length	M
Device identities	M
Item identifier	M
Help request	O
